

WALK-BEHIND TRACTORS

The Grillo Company was founded in 1953 in Italy with a mission to offer high-quality mechanized soil-working equipment to small-scale farmers; by 1960, Grillo Tillers were well-respected in Italy and surrounding countries.

Wanting to expand their offering, Grillo then began a technology-sharing venture with another Italian company, BCS, which only produced small scale hay-mowing equipment at the time.

The result: Starting in the early 1970's, both companies began offering multi-purpose walk-behind tractors with front- or rear-PTO capability to run a variety of soilworking, mowing, snow removal and other implements.

The two companies eventually parted ways in the early 1980's, but Grillo has continued to refine and improve the product that brought them fame: The rear-tine tiller... The current Grillo tiller simply has no equal.

In the 21st Century, Grillo entered the U.S. market with a complete range of professional walk-behind tractors and implements suitable for Small Farm, Garden, Landscaping, Municipal and Rental use.

With basic maintenance, these heavy-duty all-gear-drive machines will last a Lifetime and are far more space and resource efficient than typical lawn & garden equipment. Why own multiple single-purpose poorly-built belt-driven lawn & garden machines when ONE walk-behind tractor with implements will out-perform and outlast them all? Read on to see what an amazing Grillo Walk-behind tractor can do for you and your property...

GRILLO TILLER, CIRCA 1960

FEATURES:

- Complete hardened steel gear drive transmission in oil bath, no belts or chains
- Multiple speeds forward and reverse
- Commercial gas or diesel engines; 7 to 18 HP range
- Serviceable automotive clutch to transfer power and absorb shock
- Instantly adjustable and completely reversible handlebars (for front or rear PTO implements)
- Safety device to prevent tilling while in reverse
- Lockable differential and steering/parking brakes on larger models for ease of maneuvering
- Tiller has 290 RPM tine speed with bolo tines; instant 6-position depth adjustment with middle-buster, so no untilled strip in the center
- Tractors accept over 25 implements!
- 10 & 3 YEAR Warranty for home use (ask your dealer for details!)

MODEL G85 W. CUTTER BAR

MODEL G85 W. 22" TILLER

MODEL G110 W. STUMP GRINDER

MODEL G107 W. FLAIL MOWER

MODEL G110 W. BRUSH MOWER

MODEL G131 W. 32" TILLER

WARRANTY:

Grillo Tractors carry a full **10-year** Transmission warranty; 3-year warranty on all other components (and Grillo brand implements) when used for Homestead use.
—"Income-producing" use warranty: 5 years on trans., 1 year other.—

IMPLEMENT DETAILS & SPECIFICATIONS

As in the American 4-wheel tractor market, implements to fit European 2-wheel tractors are sometimes not made by the tractor manufacturer, but by independent implement manufacturers. The Implement selection we offer for the Grillo Walk-behind tractors has been chosen based on High Quality, functionality and good design.

**MODEL
G85 W.
22"
TILLER**

REAR-TINE TILLERS

Hardened steel ring and pinion drive with ball bearings; 290 rpm tine speed w/bolo style tines. Features Instant one-hand 6-position tilling depth adjustment, up to 8" depth. Middle-buster design eliminates untilled strip in center; "Helix"

tine pattern makes the smoothest action possible. Tiller width adjustable from 16" to 30" on G85-110 as HP allows (30" width requires expansion kit); or 22" to 36" on G131 (36" width requires expansion kit)

FLAIL MOWERS

Horizontally-mounted drum has multiple hinged blades that pulverize up to 1" woody growth like a chipper/shredder on wheels. These super-heavy-duty mowers grind up material better and leave it more evenly distributed than a brush mower. Great for cover crops and garden residues.

Cutting Height adjustable by full-width steel roller from .5 to 3.5 inches. 4 sizes.

ELECTRICAL GENERATOR

Now you can have up to 5500 watts of AC power anywhere you can drive your walk-behind tractor! Equipped with 2 120V plugs, a 240 twist-lock, circuit breakers and a volt-meter for accurate engine speed adjustment. (wattage output dependant on engine HP)

CHIPPER/SHREDDERS

3 Models, depending on tractor HP: Small, Medium & Large. 27 reversible hardened steel flails in shredder handle up to 3/4" material; hardened steel chipper blade mounted on flywheel chips up to 2.5" (Small), 3" (Medium) or 3.5" (Large) branches. Discharge screens available with holes down to 5/16" for cracking animal feed. (Sm & Med sizes)

ROTARY PLOW

The ultimate tool for breaking sod and primary tillage; 10" to 12" deep in a Single pass!! It's like plowing and disking in one operation. Side discharge design can also be used to build raised beds and do power hilling. Excellent for turning in cover crops. Comes with depth adjustment/transport wheel.

BRUSH MOWERS

Just like a miniature bush-hog! 1/4" thick hinged steel blades easily chop weeds, brush and saplings up to 1.5" thick. 3/16" plate steel deck with reinforced rubber flaps or chains for material discharge. Floating deck runs on 2 skids with adjustable height—2" to 4". 21", 26", 28" & 32" widths, appropriately sized for each tractor model.

HYDRAULIC LOG SPLITTER

Powered by the PTO of the walk-behind tractor, this 25-ton top-quality unit has a 2-stage valve design and log cradle. Optional 4-way wedge. Drive it where you need it with your walk-behind tractor!!

CUTTER (SICKLE) BAR MOWERS

Clog-proof European design teeth will cut up to 1" trees. All shaft drive. Standard-duty greaseable or Heavy-Duty oil bath gearbox. Also now available in double-action design to greatly reduce vibration. 30", 39", 45", 46", 53" & 59" widths.

POWER HARROWS

The ultimate in secondary tillage, for professional gardeners and landscapers. Vertical tines chop the soil without over-pulverizing or mixing soil layers; mesh roller in rear adjusts depth perfectly (0 to 6" deep) and presses bed flat & firm for perfect seeding. 4 sizes. May require front weight.

LAWN MOWERS

Heavy steel deck, steel gearbox with hardened steel gears and hinged blades: This is a Lifetime mower

deck. Adjustable cutting height from 2.5 to 4". 28", 33" & 40" cutting widths. 28" is single-spindle; 33 & 40" are twin spindle with High-Capacity deck design that allows tremendous amounts of material to be cut cleanly in one pass...2-foot tall grass and weeds are not a problem for the larger mowers.

UTILITY CART

Use the 'transport' gear of your Grillo to zip around your property carrying materials at up to 9 mph! 16 cu. ft. level, 19 cu. ft. heaped. Manual dumping bed, 1200 lb. capacity, equipped with foot and parking brake, molded seat.

SNOW BLOWERS

Oil-bath drive with extended chute rotator, adjustable throw angle and **SUPER** performance; your choice of single- or double-stage. Single-stage unit has unique side-driven rotor (to minimize clogs) that turns over 1000 RPM and is suitable for most snow. Double-stage unit will handle tremendous volumes of snow, suitable for northern climates with large snow-falls. 20", 24", 28" & 32" sizes.

STUMP GRINDER Get rid of unsightly stumps with your walk-behind tractor!! 14" diameter wheel is 1/2" thick steel, with easily replaceable carbide cutting bits. Fits G110 & up.

MOLDBOARD PLOW A classic tool, still effective. 8" and 9" sizes, depending on tractor. Single & Swivel versions available. Wheel weights and min. 20" wheels

DOZER BLADES

Snow/Dozer type: Push-only. Floating, adjustable height, 7-position angle adjusted from operator position. Replaceable scraper

bit. 32", 36", 40" & 48" sizes. **Dozer/Scraper type:** Push-or-Pull, 36", For gravel or dirt. 5-position angle adjustment. (This model can be equipped with "ends" to convert to a box scraper.) Wheel weights required for both types!

BEDSHAPER Hilling disks push soil up and drag chain levels out beds up to 32" wide / 4" tall. Disks can also be angled outward for hilling crops. Wheel weights recommended.

HIGH-SPEED BRUSH CHIPPER

Chip woody material up to 2.5" diameter **FAST**, and discharge into a truck bed or wheel-barrow if desired. Fits G110 & up.

POWER SWEEPER

40" wide, angles to left or right. Great for moving snow (up to 4"), leaves, debris, grass, gravel, etc. Heavy duty polypropylene brushes standard, poly/wire brushes optional. 48" for G110 only

ROOT DIGGER PLOW

Dig potatoes, onions, garlic, turnips, etc., with your Grillo. Round steel tines radiating from rear of plow help sift tubers out. Adjustable depth and attack angle. **WHEEL WEIGHTS REQUIRED!**

POWER BARROW Turns your Grillo into a Power Wheel-Barrow that will carry up to 6 cubic feet (heaped) or 300 lbs. Big swivel caster wheels for great maneuverability. Bed dumps to front.

CULTIVATORS Perform weed control and cultivation with these adaptable implements. Clamp-on shank design lets you change locations, depths and quantities of tools; standard are chisels, sweeps optional. 3, 5 & 6 shank models; 21", 35", 39" widths. Wheel weights recommended.

Other Specialized Implements available by request (Haybaler, Hayrake, Drop Seeder, Aerator, etc)—ask your Dealer for info!!

ACCESSORIES

HILLER/FURROWER

This popular accessory for the tiller implement attaches in seconds with a single pin. Leave wings in rear folded in to make planting furrows or expand (6 positions) to push soil out for hilling or ridging. (Works best for hilling on 27" width tillers and smaller.)

QUICK COUPLINGS

Enables implements to be changed in less than a minute with no tools (opposed to 2-4 minutes with the standard studs and nuts). Female end installs on tractor, implements require Male ends.

OTHER WEIGHTS/ACCESSORIES

To achieve proper tractor balance/performance, an engine weight, implement weight, or an additional accessory may be required in some applications. Consult your dealer.

AXLE EXTENSIONS

Increases wheel track width by 5" per set. (Custom sizes and Adjustable extensions available by request.)

WHEEL OPTIONS

Upgrade to larger wheels if necessary or install 'Dual Wheels' for extreme situations. 6 sizes available.

TILLER TRANSPORT WHEEL

Holds your tiller implement up off the ground for transporting long distances over gravel, concrete, etc. Mounts & dismounts quickly with one pin.

WHEEL WEIGHT ADAPTERS

Improve effectiveness of any tractive-type implement (where the wheels are doing the work rather than the PTO) by adding traction through wheel weights. Adapters attach to wheel lugs and accept 1" hole Barbell weight plates, which are commonly available anywhere. 2 lengths of adapter posts available.

STEEL WHEELS

Cage Design with 1" deep cleats—the ultimate in traction for soilworking... no flats, either. Special order; 2 Sizes.

PTO EXTENSIONS

Extends implement away from tractor to achieve proper balance with heavier engines/lighter implements. 3" length. Can be paired if needed.

DEBRIS SCREEN

Recommended for rotary mowing applications! Guards against debris being sucked into engine cooling ducts and clogging them. (Does not fit 7hp or 9hp engines)
